JULY 1, 1998

Lester Snow, Exec. Dir.
CALFED Bay-Delta Program
1419 Ninth Street, Suite #1155
Sacramento, Ca 95814

Dear Mr. Snow:

I would like to make a statement objecting to the part of
the Draft Environmental Impact Statement (march 1998).

Delta residents must object to Alternative #3 (Peripheral Canal).
All water users must draw from a COMMON POOL. Separating the Delta
from the Sacramento river flows will only degrade our water
further.

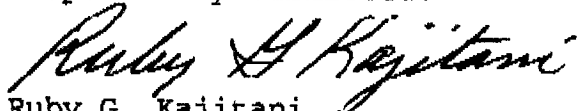

"Retirement" of productive Delta farmland must be removed from the
Plan. San Joaquin County's food and fiber are worth \$1.4 BILLION
(1997). We have public wetlands and a County-wide-Species Habitat
Protection and Open Space Plan of our own.

The Plan must include more offstream storage- enough to meet
California's needs for the future.

The Plan must include increased releases into the San Joaquin River
from Friant Dam. This is the only sure way to revive the
fisheries.

The Plan must include more funding and encouragement for municipal
water treatment facilities. Coastal communities must invest in
water reclamation and desalting facilities within their spheres.

Respectfully submitted.

Ruby G. Kajitani,
Sr. Loan Officer
Glendale Federal Bank, Stockton, Calif.
